**Directions for Questions 7–9**

(Read the passage and answer the questions.)

Bears often figure into the literature of Europe and North America, in particular, that which is written for children. "The Brown Bear of Norway" is a Scottish fairy tale telling the adventures of a girl who married a prince magically turned into a bear, and who managed to get him back into a human form by the force of her love and after many trials and difficulties. With "Goldilocks and the Three Bears", a story from England, the three bears are usually depicted as brown bears. In German-speaking countries, children are often told the fairytale of Snow White and Rose Red; the handsome prince in this tale has been transfigured into a brown bear. In the United States, parents often read to their preschool-age children the book *Brown Bear, Brown Bear, What Do You See?* to teach them their colours and how they are associated with different animals. The Russian bear is a common national personification for Russia (as well as the former Soviet Union) despite the country having no appointed national animal. The brown bear is Finland's national animal. The grizzly bear is the state animal of Montana. The California golden bear is the state animal of California. Both animals are subspecies of the brown bear, and the species was extirpated from the latter state. The coat of arms of Madrid depicts a bear reaching up into a strawberry tree to eat some of its fruit, whereas the Swiss city of Bern's coat of arms also depicts a bear and the city's name is popularly thought to derive from the German word for bear. The brown bear is depicted on the reverse of the Croatian 5 kuna coin, minted since 1993.
